

Lubricity

As the sulfur content of diesel fuel has been reduced from 5,000 to 500 to 15 parts per million, the lubricating characteristic of diesel fuel has also been reduced. XLP® diesel additive provides additional lubricity to help exceed ASTM D6079 and to help meet the Engine Manufacturers Association recommendation.

XLP diesel can help increase service life of fuel handling and metering system parts and components without contributing to combustion deposits.

Winter Operability

At cold temperatures, diesel fuel begins to gel, and wax crystals form, which can agglomerate and cause problems with pumping and filtration. Also, water content (which is normal at low levels in diesel fuel) begins to form ice crystals, which can also cause problems with fuel pumpability and fuel filter plugging.

XLP diesel contains cold flow improvers and deicers to modify the size and shape of wax crystals and to inhibit ice and wax crystal formation.

Manufactured by MidContinental Chemical Company, Inc.,
Olathe, Kansas 66061 for exclusive distribution by
Amway, Ada, Michigan 49355.
EPA Registration 175220109
CR #50795

Made in USA

A dirty engine can mean lower mileage and shorter engine life. Conditioning your engine's insides with XLP® Diesel Fuel System Cleaner can result in better mileage, fuel savings and improved engine performance.

XLP Diesel Fuel Performance Booster can help –

- ◆ ***Meet lubricity requirements suggested by the Engine Manufacturers Association***
- ◆ ***Improve fuel economy***
- ◆ ***Improve fuel stability***
- ◆ ***Reduce emissions***
- ◆ ***Reduce pour point by as much as 35° F***
- ◆ ***Reduce cold filter plugging point by as much as 32° F***
- ◆ ***Clean up and keep engine clean***
- ◆ ***Protect against ice at temperatures down to -50° F***
- ◆ ***Provide corrosion protection***

Detergency

Superb detergency promotes more complete combustion of diesel fuel in the cylinders. Improved combustion leads to reduced emissions of hydrocarbons, carbon monoxide, and particulates, as well as reduced opacity (smoke) and improved power and fuel economy.

- ◆ ***Controls deposits on fuel injector nozzles***
- ◆ ***Prevents gum and deposit formation on injector parts***
- ◆ ***Reduces emissions***
- ◆ ***Cleans up pistons***
- ◆ ***Improves fuel economy***
- ◆ ***Restores horsepower***

Super Concentrate for Multiple Treatments

One bottle of XLP Diesel Fuel Performance Booster treats multiple gallons of diesel, making it a great value.

- ◆ ***One gallon (128 oz) treats 600 gallons of fuel***
